NORTH COUNTRY SAUNAS™

BUILT FOR A BETTER TOMORROW

REAL SAUNAS.
REAL LOCATIONS.
REAL PEOPLE.
Come See the Difference!

Authentic Saunas. American Craftsmanship. A Higher Standard.

100% AMERICAN OWNED | 100% AMERICAN MADE | MANY YEARS OF SAUNA-BUILDING EXPERIENCE | COMPANY OWNED DELIVERY & SETUP | DEDICATED & REPUTABLE BUILDERS | BUILT TO WITHSTAND NEW ENGLAND WEATHER AND BEYOND

WHO WE ARE

North Country Saunas is a family of dedicated builders with many years of experience in sauna construction. We are 100% American owned and 100% American made, and that means a lot to us. Our saunas are built by skilled and reputable craftsmen right here in the United States using premium materials, time-tested construction methods and our unique seven-layer integrated insulation system. We take pride in every sauna we build and in the customers we serve.

More than a sauna.
It's an investment in your lifestyle.

VISIT. EXPERIENCE. PLAN YOURS.

We invite you to visit one of our locations, see our saunas in person and, at select locations, experience a real wood-fired sauna with it burning. You can inspect the cedar, glass, hardware, stove, chimney and overall quality of the building.

Our design and consultation program helps you create the perfect sauna for your property, your family and your goals. No appointment necessary — just stop by, call or text.

FREE, NO-OBLIGATION CONSULTATIONS

OUR ADVANTAGES

- 100% American owned & built
- Many years of sauna-building experience

- 28-gauge metal roofing with 30-year warranty
- Built tough for New England weather
- Optional change rooms, covered porches & outdoor showers
- Cold plunges with electric chiller units
- Financing available
- Company owned delivery equipment & employees
- Professional setup at your prepared site
- Delivery to every ZIP code in New England

IMPORTANT QUESTIONS TO ASK ANY SAUNA COMPANY

1. Do you have a physical location where I can see a real, working sauna?
2. Can I experience one with a wood stove burning?
3. Can I inspect the cedar, glass, hardware, stove and chimney used in your saunas?
4. Where is the sauna actually built?
5. Is it American made or imported?
6. Is what I am buying a fully built sauna or a kit?
7. Will it arrive completely assembled?
8. Who actually builds the sauna — your company or a third party?
9. Who delivers, unloads, positions and sets it up? What happens if there is a problem after delivery?

A quality sauna is a big decision.
Ask the right questions.

THINGS TO BE AWARE OF

- Some companies are simply brokers, not actual sauna builders.
- Many show high-quality, photo-shopped images that may not represent the actual product.
- Some take a deposit and then order the building from overseas, sometimes from China.
- Some units arrive as kits and require customer assembly.
- You may not know the quality of materials, insulation or the stove until it's too late.
- Some companies do not have a physical location where you can see a real sauna.
- Many use thin, low-quality stoves and inferior materials.
- Warranty support can be difficult when the company is not the actual builder.

Don't just buy a photo.
See the real thing.
